It’s also built by the Orkney brothers. Chris and Danny Orkney, in an expertly crafted vehicle born from an existing Bristol chassis, set about creating a truck that would be both practical for the job at hand and a real piece of art. We were lucky enough to meet up with Chris Orkney and talk to him about the making of this vehicle. The brothers wanted to create a truck that made sense for their company, with a diesel engine and other mechanics hidden well behind the cab, so they took a Bristol CD14B chassis and removed its engine. The chassis was then enlarged to match that of the Butte, making the result all of a piece and a massive piece of work. The chassis, particularly the cab area, has been extensively modified to make it look like a modular lorry. A similar modular job was also done to the engine, not only for cosmetic reasons, but also to allow it to be removed and replaced easily and to improve servicing, both of the engine and of the vehicle as a whole. There are some other items of interest in the lower part of the truck. The shower and toilet are now mobile and easily removed from the lower part of the truck. This also meant the space in the lower cab was reclaimed for other purposes. There’s also extra headroom, with a sliding door to allow access to the cab. The fuel tanks are made from two halves that can be moved along and locked in position to provide access to the fuel tanks. When they are 648931e174
