9/10

I'm going to cry myself to sleep again tonight.. Game is really good.

Quite hard but when you remember which resources are needed in every city and what kind of goods they're producing it will be really enjoyable to play. But still it won't be so relaxing like in Anno but it's big plus that here we can't go AFK and wait till resources will be collected or ship will reach destination like in Anno. Game keep (maybe just me) on armchair and don't want to release before ending trade but when I do it there is still so many things to do (planning what to build, when buy new ship, where make trade route, and keeping an eye on transactions and where and when next auction start).. tis echt kut. People complain about the price being too much. I agree, even though I paid half of the American price due to currency exchange rate. It's just EA being EA so good job being consistent with your history of greed.. Great mindless fun... most especially for the Adventure Time fan!

Playing this on the keyboard truly sucks. Investing in a controller (or plug one of the more recent gen console controllers) made this game a lot more fun.

This game is MATHEMATIC, yo!. I'm going to give you the best possible review I can so you know if this game is worth your money or not. The short answer, maybe. The long answer, below. In this review, I will talk about my opinion, the pros and cons, and more.

7 Days to die has always been a favorite of mine, mainly for the tower defense feel of the game. I play with friends which amps up the fun, and makes the game a little easier. Let's go over the aspects of the game together.

#### GAMEPLAY - 7/10

In this game, you must loot, hunt, farm, and build to survive. The horde night is a thrill to fight through, and looting is a fun part too, but I recommend you increase the loot values in settings because the default value is so low that you find wood clubs in gun crates. Combat feels very unsatisfying. You can shoot at a deer 10 times straight down the sight of a gun and still end up missing. Zombies can stun you, and beat on you like a punching bag. Zombies are a lot scarier because they play dead before waking up and attacking you out of nowhere. Buildings are filled with around 10-30 zombies, making looting dangerous if not prepared. Overall, gameplay is very unique and has its strengths and weaknesses.

#### GRAPHICS - 5/10

---

Graphics are much better looking since to Alpha 17 update released. Textures are better than some AAA games like Fallout 4. Overall, the graphics are a mixed bag and are not ugly, but not pretty.

#### AUDIO - 8/10

One of the strong points of this game would have to be the audio. From floors creaking to fat zombies gurgling, this game is pleasant with headphones.

#### PERFORMANCE - 6/10

This game is badly optimized. Even with graphics at lowest settings, I still fall at 15FPS.

#### DIFFICULTY: HARD

This game does not mess around Even on the easiest modes playing with four people, me and my friends still die constantly. Be careful when doing anything, even going to get water can be dangerous.

#### PROS:

- Fun for hours
- The horde made me pee myself
- Nicely crafted open world with secrets around every corner

#### CONS:

Rarely updated  
Clunky combat  
Repetitive after awhile  
Badly optimized

#### OVERALL - 7/10

The rating would be much worse if I was talking about Alpha 15. If you like zombie games, sandbox games, or survival games, why not try them all in one package?. Depraved is still a terrible game to play. I tried playing It but since you can not disable the animal attacks I will never play this game again. There are still no new buildings in the game and still no modding or steam workshop. I gave up on this game since the Devs refuse to address those terrible issues. This has to be the worse game ever developed and that I think It was developed by people who just don't want to listen. If you refuse to listen to what people are telling you then please stop developing the game.

I will never recommend the game to anyone because of the lack of support coming from the devs. If you like games that are set in the wild west then buy this. But buyer beware there is still not enough content to make me happy and plus no way to disable those animal attacks. Since the game came out It has not only been a huge disappointment to me but just a terrible game overall. Since the game has been out all the Devs done is take your money and ran with It. The devs are very sad because I was hoping that this game was going to be very good but the game falls very short.

The game might attract people but unless the devs start paying attention to what the people are asking for on the forum and also read the reviews that get posted this game will die.

A brilliant RPGmaker game

Part farming sim

Part Pokemon

But a ton of fun

It is very well made, but have a few bugs.

Definatly worth the money.. The Dark Souls of QWOP. One of those "always moving forward" turn-based battle formation games. Pretty lame.. Don't. I picked this game up in the indie action pack for a dollar fifty, and it's not even worth a penny of what I spent on it, let alone full price. It's bad.

I'd rather get♥♥♥♥♥♥♥♥by clowns again.. For its price, it's quite funny and interesting, but not too detailed. There's an easily accessible Walkthrough, but there's a lot of moon logic (I'm looking at you, Stream in Act 2!). Despite minor inconveniences in gameplay, the program is very solid and stable. Definitely get it while it's on sale!
